Complete Air Distribution Solutions

In the grow industry, it is paramount to ensure proper air distribution. With our fabric-based solutions and custom engineered products, we prevent microclimates, facilitate uniform temperature and humidity within the grow space, and allow the plants to flourish through every stage of their growth cycle.

EVEN AIR DISTRIBUTION

- Air distributed at the needed velocity with customized linear dispersion.

NO CONDENSATION

- Fabric ducts won't sweat or corrode.

NO MICROCLIMATES

- Ensures even temperatures and uniform humidity throughout the canopy.

HYGIENE

- Ensures the highest hygiene with no molds, mildew, or pests. Fabric ducts are easy to launder and sanitize to provide safe and hygienic air delivery.
