Ducts are hung with Adjustable Cable Drops. The H-rail, so named because it looks like a H in the cross section, is made out of anodized aluminum, making it an excellent choice for corrosive environments.

Example of duct system configuration

Elbows

We provide custom elbows in any degree and size.

Reductions

Concentric and eccentric reducers are available.

Branches

Concentric and eccentric branch take-offs are available.

H-RAIL for Type 13

When assembling an H-rail system the pieces of H-rail are joined together by using a metal connector that is fastened to each rail using set screws. The duct will have sliders or a bulb edge to slide into the H-rail at the appropriate locations for both single and double H-rail configurations. The rails are bent to the exact angle that is needed to suit the elbows in your FabricAir duct system.

Adjustable Cable Lock for SS suspension selection

No tools are necessary with the adjustable cable locks. Simply press the locking mechanism down and adjust.

Adjustable Cable Lock for GV suspension selection
