WHAT'S IT LIKE TO WORK AT FABRICAIR?

SERUD AHMAD, COUNTRY MANAGER GERMANY & AUSTRIA

"I have a unique opportunity to build the local team that will form the future of HVAC/R on the German and Austrian markets. We are tasked with growing the markets and as a team we will be marketing an innovative air engineering technology – a true gamechanger within HVAC/R. I am very excited!"

LAURIS REZGALS - KALPMANIS, R&D MANAGER

"We have a great team spirit and work together across departments and national borders. We work with diverse and challenging tasks in a good learning environment, where our personal and professional talents are at play every day."

WELCOME TO FABRICAIR

This video provides a brief introduction to our company and the world of fabric-based air dispersion technology. Our mission is to provide non-metal HVAC/R solutions for air distribution and air dispersion that create outstanding value for our customers, beyond what any traditional or conventional ventilation solution has ever done. This video explains how we do this throughout each department by living by our mantra “make it better – make it easier”.

UNSOLICITED APPLICATIONS

FabricAir wants to attract, motivate and develop the most talented and dedicated employees. If you wish to join our team, please apply for one of our vacancies or send us an unsolicited application at jobs@fabricair.com. By forwarding your application to us, you accept and agree that we may register and store your data in our system for a period of 180 days in order to use your application

data for current and potential future recruitment purposes. We only use your data for recruitment purposes and do not share your information with any third parties. Your application data is strictly confidential and can only be accessed by relevant hiring managers. The permission you have given us to process and store your application data may be recalled at any time, after which your personal data will be deleted. FabricAir strives to always be compliant with current data regulations.
