

A busy week at Mostra Convegno

Booth no. A01 in hall 24 is buzzing with exciting talks about air dispersion solutions and FabricAir's unique technology.

15th March 2018

This week the FabricAir team is exhibiting at the MCE in Milan, together with our Italian distributor, **ProjectAir**. Our booth features not one but two new, cool show'n'tell items: The Blower Unit and the InfoKiosk. These items are part of our new exhibition concept demonstrating our technology and endless application possibilities of our solutions. Come check it out. Friday is the last day of the show.
