

Instalación sencilla

Los sistemas de dispersión FabricAir son intuitivos y fáciles de instalar. Cada sección del conducto viene marcada con una etiqueta individual, lo que le permite saber el lugar exacto de cada pieza. No se necesitan herramientas específicas; puede encontrar todo lo que necesita en una caja de herramientas. Una instalación sencilla reduce de forma significativa las horas de mano de obra en comparación con los conductos metálicos u otros sistemas de conductos textiles. Esto facilita que su proyecto se construya a tiempo y sin salirse del presupuesto.

Cost savings from installation

Installing FabricAir dispersion systems is fast and easy, and will reduce costs for the entire project due to the lower number of man hours. FabricAir systems are so...
