Ducts are hung with Adjustable Cable Drop. The H-rail, so named because it looks like a H in the cross section, is made out of anodized aluminum, making it an excellent choice for corrosive environments.

# Example of duct system configuration

## Elbows

We provide custom elbows in any degree and size.

## Shape Retention

Our ducts come with your selected Shape Retention solution: All-in-One or Internal 360° Hoops. The 360° hoops are hidden inside the duct whereas All-in-One 180° hoops are sewn on the exterior. Shape retaining hardware is removable for laundering.

## Reductions

Concentric and eccentric reducers are available.

## Branches

Concentric and eccentric branch take-offs are available.

Options available for **Type 08**

# H-RAIL for Type 08

When assembling an H-rail system the pieces of H-rail are joined together by using a metal connector that is fastened to each rail using set screws. The duct will have sliders or a bulb edge to slide into the H-rail at the appropriate locations for both single and double H-rail configurations. The rails are bent to the exact angle that is needed to suit the elbows in your FabricAir duct system.
